

Introduction to Intelligent Systems (CSCI-331-02)
Professor David Garcia-Muñoz
Nick Greenquist and Alex Hedges
Due 2017-03-28

Project 1 Execution Instructions

1. Unzip the files to your computer
2. Compile with command `javac Pathfinder.java`
3. Run with the following commands for the 3 different search methods:
 - a. `java Pathfinder bfs RitMap.txt`
 - b. `java Pathfinder backtracking RitMap.txt`
 - c. `java Pathfinder astar RitMap.txt`
4. Enter start and end nodes with their 3-letter abbreviation in all caps (e.g. GOL)
5. Replace `RitMap.txt` with `RitMap2.txt` to run A* using the second heuristic
