

1. Do a search to find a research paper in which a topic related to Machine Learning is described.
2. Prepare a PowerPoint in which you briefly explain the paper and the research described in it. According to your viewpoint, try to determine pros and cons of the research presented in the paper.
3. Duration: 10 minutes.
4. Main evaluation criteria:
  - a. Adapts to the time requirements.
  - b. Connection to Machine Learning.
  - c. Clarity and seriousness.

Remember that you will work in groups. The teams will be the same as those formed for projects 1 and 2.
